Education

Symbiosis Institute of Technology, Pune

B.Tech – Computer Science (Engineering)

Allenhouse Public School, Kanpur

Class XII – CBSE

Technical Skills

Languages: JavaScript, Python, Java, C++, SQL

Frameworks & Libraries: Node.js, Express.js, React.js, Next.js, FastAPI, Tailwind CSS, Socket.io

Databases: MongoDB, PostgreSQL, MySQL, Redis, Supabase, Firebase

Cloud & DevOps: AWS (EC2, ECS, ECR), GitHub Actions, CI/CD, Docker, Vercel, Postman, Linux

CS Concepts: Data Structures & Algorithms, OOP, REST APIs, System Design, Operating Systems

Projects

RoomSync | *Intelligent Hostel Roommate Allocation System* | GitHub

- Architected a 3-service system (Next.js frontend, Node.js/Express API, Python FastAPI ML engine) processing 30+ compatibility datapoints per student to automate hostel roommate allocation at scale.
- Built Scikit-learn clustering pipeline for optimized roommate assignments; engineered admin controls including swap overrides, room-locking, and a change-request pipeline with a real-time dashboard.
- Designed data pipelines supporting CSV export and Google Sheets sync, enabling institutions to manage and audit the full student allocation lifecycle.

Stack: Next.js, Node.js, Express.js, MongoDB, Python, FastAPI, Scikit-learn

Codemia | *Automated Code Grading Platform* | GitHub

- Engineered a scalable Node.js/Express backend with Redis + BullMQ job queues for secure multi-language code execution (C++/Java/Python/JS), reducing execution latency by 50% via parallel processing.
- Built React/Tailwind dashboards with role-based JWT authentication, automated grading, and plagiarism detection – improving evaluator efficiency by 70%.

Stack: React.js, Node.js, Express.js, Supabase, Redis, BullMQ, Piston API, JWT, Nginx

CraftMyProfile | *AI-Powered Resume Builder* | GitHub

- Built a full-stack AI resume builder leveraging Gemini API for role-specific content suggestions; implemented section-level prompt engineering to tailor output for ATS optimization.
- Architected secure file handling with Multer and JWT authentication; deployed on Vercel with GitHub Actions CI/CD pipeline, achieving zero-downtime releases.

Stack: React.js, Node.js, Express.js, MongoDB, Gemini API, Multer, Tailwind CSS, Vite

SymbiConnect | *Real-Time College Chat Platform* | GitHub

- Built a real-time chat platform for the college community using Socket.io, enabling low-latency messaging and media sharing across concurrent users.
- Integrated MongoDB Atlas for persistent storage and JWT for secure auth; deployed on Render with 99% uptime and a fully responsive Tailwind CSS interface.

Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Tailwind CSS

Leadership & Achievements

Co-Founder & Lead – FOSS Club, Symbiosis Institute of Technology

Co-founded an open-source student community from the ground up; organized **FOSSHack24** with **200+ participants**, securing sponsorships and managing end-to-end coordination with mentors, sponsors, and student teams. Trained juniors in Git, open-source licensing, and contribution workflows; championed a culture of building in the open.

Flutter Lead – Google Developer Student Clubs (GDSC), SIT

Led Flutter workshops mentoring **100+ students**; guided peers to build and publish real-world mobile apps on GitHub.

Hackathon Achievements: **Winner** – Rewind & Recode (Maharashtra Zone) | **Finalist** – Smart India Hackathon (Internal Round)

Certifications

Core CS: CS50 (HarvardX), DSA in Java (Apna College), Java Programming (Duke University)

Cloud: AWS Cloud Practitioner (Udemy), AWS Certified Solution Architect (Udemy), Nutanix NCA 6.0

AI & ML: Machine Learning (Scaler), Deep Learning Specialization (Coursera)
